Wessex Water Services Ltd
2020-21 Indicative Wholesale Charges

Introduction

Our Wholesale Charges document fixes the charges that, in the absence of any contractual agreement, our licensed providers must pay for services we provide in the course of carrying out our duties as a water and sewerage undertaker.

Ofwat's Wholesale Charging Rules published in January 2019 requires undertakers to publish 2020-21 indicative wholesale charges in October 2019.

For the purposes of this document we provide information on wholesale charges defined by Ofwat in its Wholesale Charging Rules.

Indicative charges were reviewed by the Board of Directors in September 2019 based on the best information at the time. Final charges will be updated for November CPIH and the outcome of the PR19 final determination, published in December 2019. Updated charges will be published as part of a Wholesale Charges document which will fix charges from 1 April 2020. In the event that other new information becomes available, including that received through ongoing stakeholder engagement, 2020-21 wholesale charges will be updated accordingly before their final approval by the Board.

This document sets out:

- Indicative primary charges
- Indicative non-primary charges
- Indicative wholesale special agreement information

In the interests of transparency, we have also published indicative wholesale charges using the standard wholesale schedule template.
